

Dashrath Mundkar

Lead DevOps / Site Reliability Engineer | Munich, Bavaria, Germany

dashrathmundkar@gmail.com | [linkedin.com/in/dashrathmundkar](https://www.linkedin.com/in/dashrathmundkar) | github.com/DashrathMundkar | dashrath-mundkar.github.io

Summary

DevOps / SRE professional with **7+ years** of experience designing, automating, and scaling **cloud-native platforms** across **Azure and AWS**. Specialize in **Kubernetes, Infrastructure as Code (Terraform), CI/CD platform engineering**, and **observability**. Known for enabling engineering teams to ship faster and safer through automation, reliability practices (SLOs/SLAs), security controls (DevSecOps), and pragmatic cost optimization.

Core Skills

Cloud: Microsoft Azure, AWS

Containers & Orchestration Tech: Kubernetes, OpenShift, Docker, Podman Helm, ArgoCD, Istio

CI/CD & DevOps Tooling: Jenkins, GitHub, GitLab, SonarQube, BlackDuck, Artifactory, Maven, Groovy

IaC & Automation: Terraform, Bash, scripting for build, deploy and maintenance

Observability: Datadog, Prometheus, ELK, Grafana

DevSecOps: Policy-as-code (Kyverno), vulnerability scanning (Snyk)

Platforms & OS: Linux, Windows

Practices: High availability, migration planning, SLO/SLI, incident readiness, coaching/mentoring

Professional Experience

NTT DATA Deutschland SE — Lead Technical Consultant

Jul 2022 – Present

Munich, Germany

- Led a team of four engineers on a client engagement, ensuring smooth delivery without operational issues.
- Designed and managed **secure, scalable Azure infrastructure** using **Terraform (IaC)** with a focus on reliability, availability, and repeatability across environments.
- Led end-to-end onboarding of projects into Azure, defining landing-zone aligned setups (networking, access patterns, deployment workflows) to accelerate delivery.
- Planned and executed **application and database migration strategies** with minimal downtime, ensuring business continuity and clear rollback/runbook readiness.
- Built and maintained **enterprise CI/CD platforms** using **Jenkins, GitHub, Argo CD, Helm, Docker, SonarQube, Artifactory, Groovy**, enabling fully automated build, test, and deployment pipelines.
- Developed and standardized **custom Docker images** and automation scripts (**Bash, Maven, Jenkins**) to reduce build variance and improve reproducibility.
- Implemented **observability** with **Datadog, Prometheus, Grafana**, improving proactive detection and reducing time-to-triage through actionable dashboards and alerts.
- Introduced **DevSecOps controls** (e.g., **Kyverno** for policy enforcement, **Snyk** for vulnerability scanning) to shift security left without slowing delivery.
- Defined and rolled out **SLOs aligned to SLAs**, collaborating with stakeholders to set measurable reliability targets and operational guardrails.
- Drove continuous improvement to reduce technical debt and increase automation across CI/CD and infrastructure provisioning.
- Mentored cross-functional teams and acted as a DevOps coach, promoting cloud-native adoption, delivery standards, and operational best practices.
- Delivered **cost optimization** improvements by selecting right-fit infrastructure models based on workload requirements and utilization patterns.
- Partnered with clients as a technical advisor to align DevOps practices.

NTT DATA Deutschland SE — Senior Technical Consultant
Munich, Germany

Mar 2019 – Jul 2022

- Enabled **250+ developers** across multiple teams by designing and operating **robust CI/CD infrastructure**.
- Built CI/CD pipelines leveraging **AWS, Jenkins, GitLab, Argo CD, Helm, Docker, Kubernetes/OpenShift, RHEL, SonarQube, Artifactory, Groovy**.
- Containerized applications and automated build and deployment workflows.
- Installed and maintained CI/CD and automation tooling.
- Automated infrastructure and deployments using **Docker, Kubernetes, and OpenShift**.
- Implemented monitoring solutions with **Prometheus and Grafana**.
- Improved CI/CD scalability and deployment reliability.
- Led migration of applications and CI/CD infrastructure from OpenShift to **AWS**.
- Introduced and implemented developer-centric tools, including OpenGrok and Pact Broker for contract testing, improving productivity and streamlining development workflows.
- Enabled a streamlined release process by minimizing manual effort through automation.
- Onboarded and guided team members on project workflows, tools, and DevOps best practices.
- Supported DevOps related work / activities using JIRA

Sivantos Group — Working Student (Software/IT)
Erlangen, Germany

Sep 2017 – Jan 2019

- Contributed to DevOps initiatives by migrating internal tools from legacy deployments to modern DevOps practices using Docker Compose and Jenkins. Developed and maintained custom Docker images and automation scripts (Bash, Maven, Jenkins) to streamline build, deployment, and maintenance processes.
- Developed and maintained the **Sivantos Corporate Directory**.
- Supported automated jobs using **VisualCron**.
- Maintained employee database workflows using **MySQL**.

Certifications

- Microsoft Certified: **Azure Solutions Architect Expert**
- Microsoft Certified: **Azure Administrator Associate**
- Microsoft Certified: **Azure Network Engineer Associate**
- **AWS Certified Solutions Architect - Associate**
- **Certified Kubernetes Administrator (CKA)**
- **AWS Certified Cloud Practitioner**

Education

Otto-Friedrich-Universität Bamberg — Master's Degree in Distributed Systems	2016 – 2018
University of Pune — Bachelor of Engineering (B.E.), Computer Engineering	2012 – 2016
